

London and District Men's Dart League

Venues

All venues must be licensed by the LCBO at the time of registration and maintain their license throughout the entire dart season.

All venues must be approved by the Executive Board and will be subject to inspection to ensure that all required standards are met.

All games shall be played on a standard dart board made of bristle, numbering one (1) to twenty (20) with a centered twenty – five (25) and fifty (50) circle and have a double and triple ring area

Required Venue Standards

1. At least 2 League approved boards must be properly installed on a flat wall. The center of the bull will be 68 inches (5ft, 6 in) from the floor and the toe or oche line will be 93.25 inches (7ft, 9.25 in) from the face of the board. A line descending from the center of the bull angled to the floor ending at the toe line will measure 115 3/8 inches (9ft, 7 3/8 in).
2. The club will affix to the floor a toe line or use a distinctly marked mat. Use of erasable toe line indicators will be disallowed, (i.e. chalk lines, pencil lines or others) that are not considered permanent. There is no limit to its length, but it shall be a minimum of fifteen (15) inches in length. A player may move as far along the line as he can, providing he does not interfere with a player on another board
3. The club may provide a runner of various materials from the dart board to the toe line or beyond. This runner must be secure at both ends and the toe line clearly marked and attached to the runner if it extends beyond the toe line.
4. The club will provide a surface of not less than 18" by 24" for the purpose of keeping score. These surfaces will be firmly attached to the wall adjacent to each board.
5. Proper illumination of the board must be installed in a manner so as not to interfere with the trajectory of a thrown dart and to not affect the vision of the player. One 100 to 150 watt spot or floodlight or 75 watt spot or floodlight is recommended for each board.
6. All boards must be installed with no less than 48" between bulls. There will be an interference space of not less than 2" between boards and scoring surfaces.
7. The club must provide at all times a clean and clear area for members to play. The league defines this area as 4' by 10' for each board. There will be no other objects in this area during League play.
8. **The club must also provide adequate seating arrangements that do not interfere with the play area.**
9. Television sets, display monitors or any other visual media must not be in operation in the designated play area while League play is in effect. Any of the aforementioned will be turned off at the request of either team captain
10. Entertainment provided by the club must be conducted so as not to interfere with the game of darts. In the event that a team complains about volume, lighting or actions that interfere with darts, adjustments must be made. If not complied with either team may file a protest.
11. The League has the right to refuse or suspend any club it feels is not following the rules. Should the board find it necessary to refuse play out of any club the team(s) may choose to:
 - A. Find another League certified playing venue.
 - B. Ask the Board for a list of certified venues.
 - C. Drop out of the League until the venue is certified.
12. The board will inform the membership of any club suspensions.

London and District Men's Dart League

13. The Board will from time to time, as it sees fit, visit certified venues for the purpose of inspection of and will address any and all deviance noted.
